

# LdV project „V o L a n T“

2008-1-SK1-LE005-00224

## about project

### Name of the project

Odborné jazykové vzdelávanie pre študentov automechanikov a príbuzné profesie – VoLanT.

### Duration of the project

24 months ( 01. 11. 2008 – 31. 10. 2010 )

### Background of the project

“VoLanT” project offers one possible solution to the complex problem of the lack of innovative approaches and inaccessibility of teaching materials for the vocationally – orientated language learning in Slovak VET system, in specific field of Car repair, Service and Retail related professions. One of the project partners, Secondary Technical School J.Jonáša from Bratislava, Slovak republic, is tackling this problem on daily basis, one example being the concrete experience of students participating in practical work stays in school partnership institutions abroad, where they are unable to communicate in foreign language, lacking basic vocational terminology related to workplace and work processes and also general communication skills. From this reason, 4 national Slovak institutions and 3 partners from abroad decided to create a partnership network and provide solutions to address this problem.

### Aims of the project

Project aims at supporting innovative approaches in vocationally-orientated language learning, in specific field of Car repair, Service and Retail, through the transfer of existing innovative teaching methodologies used in the Czech republic and in the UK, and their adaptation for the specific needs of the VET system in Slovak republic.

### Target group

Cieľovou skupinou projektu sú študenti SOU a SOŠ so zameraním na autoprofesie v SR.

### Supposed project outcomes

There will be 3 main project outputs:

- teachers' textbook for vocational language teaching in EN, DE, FR,
- students' exercise book for vocational language learning in EN, DE, FR,
- multilingual dictionary, for the grades 1 – 5 of secondary vocational schools, in 3 languages (English, German, French),
- in addition, all the outputs will be accessible also in online version through interactive internet portal.

## **Coordinator of the project:**

### **Centre for Modern Education**

Mrs. Jana Sýrovková  
Prírodovedecká fakulta UK  
P.O.BOX 70  
840 00 Bratislava 4, SLOVAKIA
